Accessories and  
Maintenance

# Consultation

At Sample Automation we strive to work closely with our customers. We take time to determine each of our clients' specific requirements in order to evaluate the best way forward and help them determine the best option for them. Get in touch for a conversation with one of our sales team specifically built on your company's needs.

Sample Automation have a range of products that can be bought as they are or can be adapted to fit a client's processing line.

After an initial inquiry our aim is to set up a meeting, face to face or digitally depending on customer location. During this meeting we determine

- Process (performance figures, items to be handled etc.)
- Interfaces (operator, upstream and downstream systems)
- Timelines
- Budget costs
- Overview Design

# Maintenance

At Sample Automation we believe in supporting our clients all the way, not just during the sales process. Once a Sample Automation client we do everything we can to assure that you are - and stay - happy and satisfied with your purchase.

In our technical support area, you can find more than just contact data of our service teams, it provides service information, as well as information about our attractive service contracts for Sample Automation. We gladly consult and advise you in all technical matters – contact us now!

In order to increase the longevity of our systems, our clients can also choose to opt into Sample Automation's full Maintenance package. This can be adapted to client specific needs and can help reduce downtime in the long run as well as pre-empt the unexpected. Our maintenance package includes

- 2 hours of training on how to operate the system and get the most out of it
- Scheduled preventative maintenance visits (1 – 2 times a year, operator dependent)
- Remote support (phone, email, digital meetings as required)
- Emergency maintenance visits (at client cost)
- Reduced cost replacement parts
- Safety and service certificates
